

## Which are the Application Fields of CySCoS?

Virtually any conventional, digital, programmable device may be replaced by a CySCoS of similar performance. CySCoS was especially designed to support these fields:

- **Industry 4.0 and IoT**
  - Controlling devices
  - Monitoring devices
  - Counters
  - Participation in networks of differing
    - access attributes
    - security classification
    - usage (e.g. purchasing, production, sales, human resources, ...)
- **Transportation**
  - signals
  - traffic control infrastructure
  - interacting components of assisted vehicles
  - autonomous vehicles
- **Handling personal data in**
- administration
- public health
- banking
- insurances
- corporations
